

Senior UX Designer

At Natzka, we're revolutionizing the decision-making process for our customers working with traditional data warehouse technologies. This ambitious goal is backed by the use of sophisticated proprietary algorithms and the most recent results from Artificial Intelligence. We are looking for a senior UX designer to build the foundations of our SaaS platform and implement meaningful user interactions in this complex data driven world.

We value and promote personal initiative, clarity of thought, ability to learn, teamwork, accountability, and a striving for achievement. We collaborate in our offices in the city of Zurich, or remotely.

If that sounds appealing to you and you want to play a key role in a vibrant startup culture, please read on.

Responsibilities

- You will be envisioning and designing the future of how people interact with the Natzka platform.
- You will be laying the foundation of the Natzka UX design language. You are capable of sharing and implementing this scalable and consistent design vision.
- With a focus on data modelling, ingestion, and consuming data, we are looking for ground-breaking methods that make our customers feel at home on our platform.
- The complexity of the Natzka feature set makes this a challenging job that encourages you to bring even more to the table. In order to achieve this, you research user habits, identify friction points, and develop prototypes for new promising features.
- You will be mapping user journeys in detail to support the further development of the platform.
- For the best user experience possible, you ask questions inside Natzka and out.
- Together with the highly skilled team of engineers at Natzka you will build upon these foundations to implement the design vision.

Requirements

- Degree in a relevant design field.
- Inspiring portfolio showcasing user centered design cases.
- Proven record of successful enterprise-level projects.
- Experience working with database engines, AI and data modelling software.
- Eligibility for a Swiss work permit.
- Fluency in English.

We offer an attractive compensation based on experience and skills, flexible working hours, and training opportunities.

Please send your complete application to: Mr Patrizio Contu, CTO, (including CV with photo, references, education and qualification certificates) per e-mail: techlab@natzka.com

Please kindly note that we only accept applications from direct candidates, no recruitment agencies. Thank you for your understanding.
